

SPECIAL SYSTEMS

Special system solutions developed for different needs, offering superior performance, long service life and an aesthetic appearance.

SYSTEM 01 STEEL CONSTRUCTION PROTECTION SYSTEMS (EPOXY & POLYURETHANE)

High chemical and mechanical resistance coating systems that provide long-lasting protection for steel structures. Ideal for industrial facilities, bridges, warehouses and heavy-duty structures.

LAYER SYSTEM

SYSTEM FEATURES

- ✓ High corrosion resistance
- ✓ Long service life
- ✓ Chemical resistance
- ✓ Mechanical durability
- ✓ Various color options
- ✓ Suitable for industrial use

SYSTEM 02 TANK LINING SYSTEMS (EPOXY)

Special epoxy systems that provide maximum resistance for tanks and storage areas. Used for chemical storage tanks, water tanks, fuel tanks and industrial liquid storage.

LAYER SYSTEM

SYSTEM FEATURES

- ✓ Excellent chemical resistance
- ✓ Leakage prevention
- ✓ Suitable for liquid storage
- ✓ Hygienic surface
- ✓ Long service life
- ✓ Suitable for food-grade tanks

SYSTEM 03 INDUSTRIAL FLOOR COATING SYSTEMS

High-performance coating systems used in production areas, warehouses, parking lots and workshops. Resistant to heavy loads, abrasion and chemicals.

LAYER SYSTEM

SYSTEM FEATURES

- ✓ High abrasion resistance
- ✓ High load-bearing capacity
- ✓ Dust-free and easy to clean
- ✓ Long service life
- ✓ Various color options
- ✓ Safe working environment

SYSTEM 04 EPOXY & POLYURETHANE FLOOR SYSTEMS (DECORATIVE & PROTECTIVE)

Aesthetic and durable floor coating systems suitable for all kinds of indoor and outdoor areas. Ideal for schools, hospitals, shopping malls, offices and residential spaces.

LAYER SYSTEM

SYSTEM FEATURES

- ✓ Decorative appearance
- ✓ High chemical resistance
- ✓ Easy application
- ✓ Hygienic and seamless surface
- ✓ Suitable for indoor and outdoor use
- ✓ Variety of color and design options

APPLICATION AREAS

SYSTEM SELECTION GUIDE

GENERAL ADVANTAGES

- ✓ Strong and durable structures
- ✓ Resistance to chemicals and abrasion
- ✓ Aesthetic and seamless surfaces
- ✓ Wide range of application areas
- ✓ Hygienic and easy to clean
- ✓ Long service life
- ✓ Secure and safe working environment
- ✓ Reliable and economical solutions

SUPERIOR SOLUTIONS FOR INDUSTRIAL PROTECTION

EPOXY & POLYURETHANE SYSTEMS

VOREXA offers high-performance coating systems for steel and concrete surfaces. Provides maximum protection, long-lasting durability and an aesthetic appearance under demanding conditions.

PRODUCT LIST

1. SYSTEM
EPOXY POLYURETHANE TOPCOAT

2. SYSTEM
EPOXY PUTTY

3. SYSTEM
EPOXY PRIMER

4. SYSTEM
ZINC-RICH EPOXY PRIMER

1. SYSTEM

EPOXY POLYURETHANE TOPCOAT
16 kg + 4 kg (A+B)

Two-component, high-performance polyurethane topcoat. Provides high UV resistance, excellent gloss retention and color protection. Offers superior resistance to chemical and physical abrasion and saltwater environments.

LAYER SYSTEM

- 3 VOREXA Topcoat
- 2 VOREXA Epoxy Primer
- 1 SURFACE (Concrete)

2. SYSTEM

EPOXY PUTTY
16 kg + 4 kg (A+B)

Two-component epoxy-based filler. Provides excellent adhesion to surfaces, fills cracks, creates a smooth and even surface, and provides mechanical resistance for thick-layer applications.

LAYER SYSTEM

- 3 VOREXA Epoxy Coating
- 2 VOREXA Epoxy Putty
- 1 SURFACE (Concrete)

3. SYSTEM

EPOXY PRIMER
16 kg + 4 kg (A+B)

Two-component epoxy-based coating. Provides excellent adhesion to the surface and protects against corrosion. Creates an ideal preparation surface for the topcoat.

LAYER SYSTEM

- 3 VOREXA Topcoat
- 2 VOREXA Epoxy Primer
- 1 SURFACE (Concrete)

4. SYSTEM

ZINC-RICH EPOXY PRIMER
16 kg + 4 kg (A+B)

Two-component zinc phosphate-based epoxy primer. Protects steel surfaces against corrosion by providing cathodic protection. Ideal solution for heavy-duty service conditions.

LAYER SYSTEM

- 3 VOREXA Topcoat
- 2 VOREXA Zinc-Rich Epoxy Primer
- 1 SURFACE (Metal)

PACKAGING SET

16 kg (Part A)
4 kg (Part B)
Set Packaging

16 kg
